Introduction and data familiarisation

The Employee Satisfaction Survey dataset is a comprehensive collection of information regarding employees within a company. It includes essential details such as employee identification numbers, self-reported satisfaction levels, performance evaluations, project involvement, work hours, tenure with the company, work accidents, promotions received in the last 5 years, departmental affiliations, and salary levels. This dataset offers valuable insights into the factors influencing employee satisfaction and can be used to analyze and understand various aspects of the workplace environment

Tools used in this project: Jupyter notebook, Microsoft PowerPoint and Python and it's frameworks for data analysis

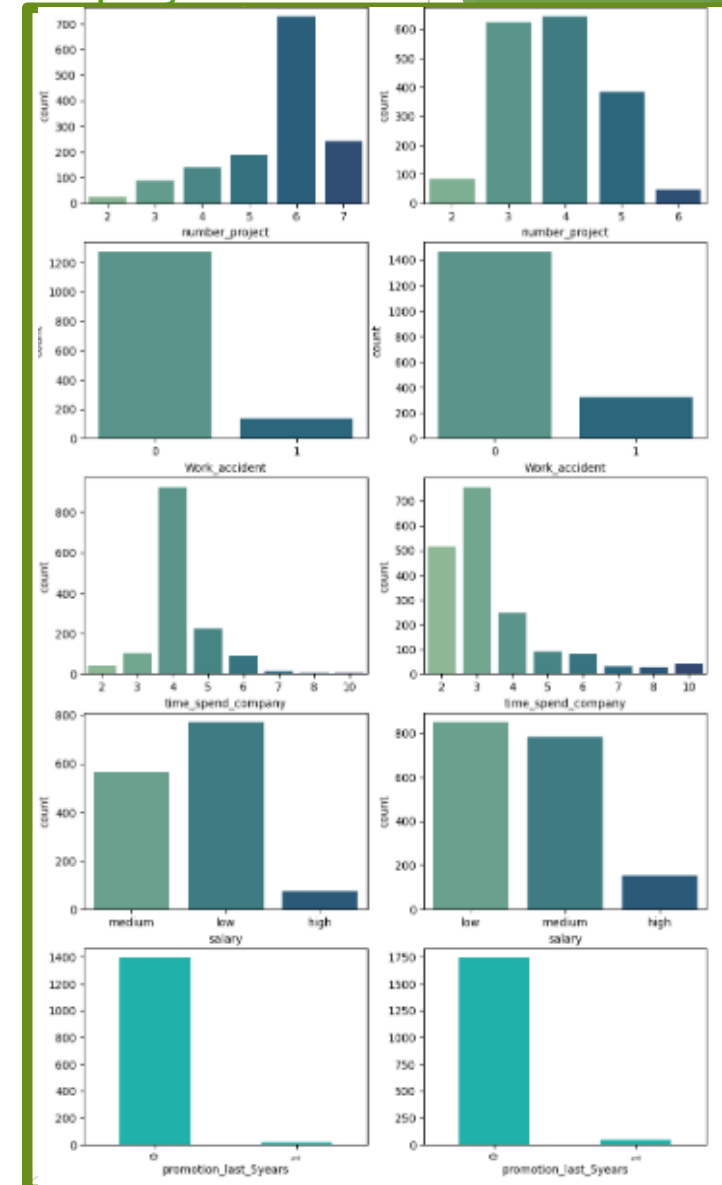

Introduction and data familiarisation

Column	Description
Emp ID	Employee ID
Satisfaction_level	Employee's self-reported job satisfaction level
Last_evaluation	Employee's most recent performance evaluation score
Number_project	Number of projects the employee is currently working on
Average_monthly_hours	Average number of hours worked per month by the employee
Time_spend_company	Number of years the employee has spent with the company
Work_accident	whether the employee has experienced a work accident (1 for yes, 0 for no)
Promotion_last_5years	Whether achieved a promotion in last 5 years.(0 for no or 1 for yes)
dept	Department of the employee
salary	Salary of the employee(low, medium, high)

Data analysis

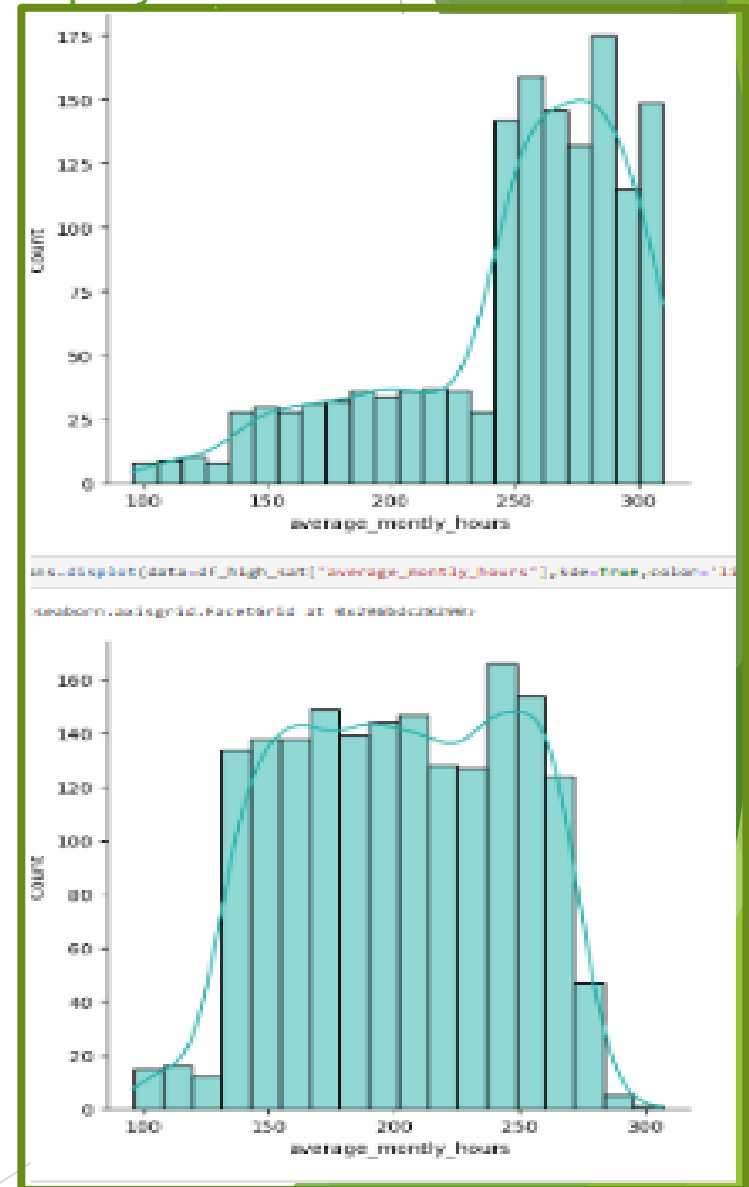

- what are the factors that affects satisfaction value of employees?

- Employees who gives a lower satisfaction rate, majority of them has to work on 6 or 7 projects currently. Where employees with high satisfaction rate, majority of them has to work on only 3 or 4 projects currently.
- In high satisfaction rate category, there are employees who have done more work accidents and In lower satisfaction category, there are employees with lower work accidents.
- Number of employees with more than 5 years of work experience is higher in category with high satisfaction rate than category with lower satisfaction rate.

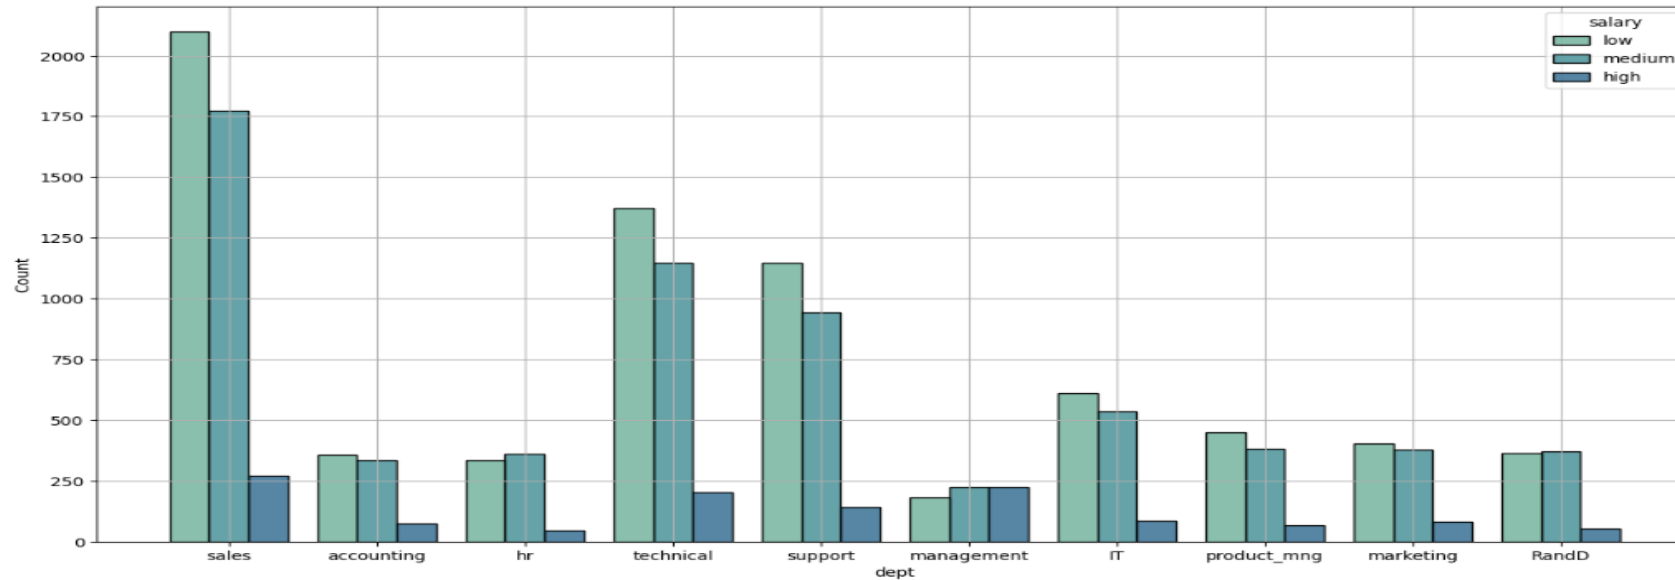

Data analysis

- what are the factors that affects satisfaction value of employees?
- Around 580 employees get a medium and less than 100 employees get a high salary in lower satisfaction category. where around 780 employees get a medium and more than 100 employees get high salary in higher satisfaction category
- Since the number of experienced people are high in higher satisfaction category, the number of employees who got promotion in the last 5 years is high in this category.
- The average monthly working time of people who are in lower satisfaction category is 250. where in higher satisfaction category is 201

Data analysis

- Analyze the salary data distribution in each department.

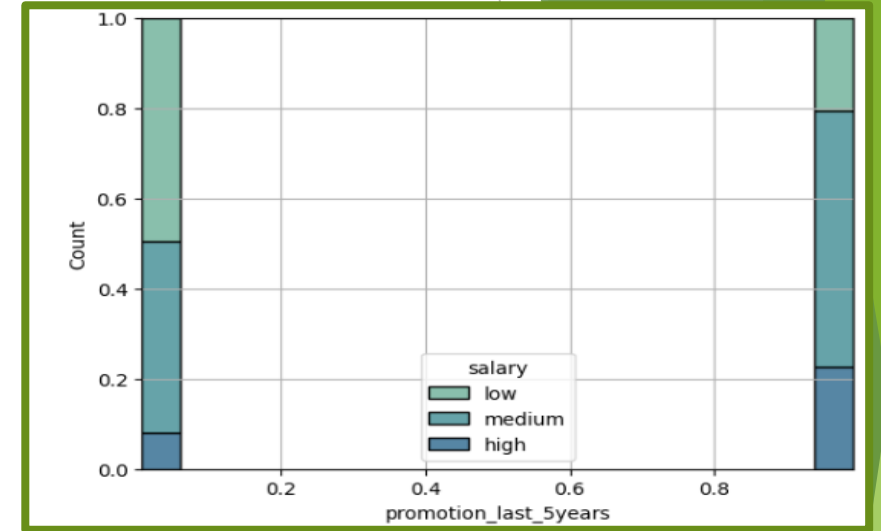

- The highest number of 'high salary' employees are in sales, management and technical departments
- The least number of 'high salary' employees are in HR and RandD departments.
- But when we take the percentage, all departments except management department, the employees who get a high salary is less than 10%. Where around 36% of employees from management department gets high salary.

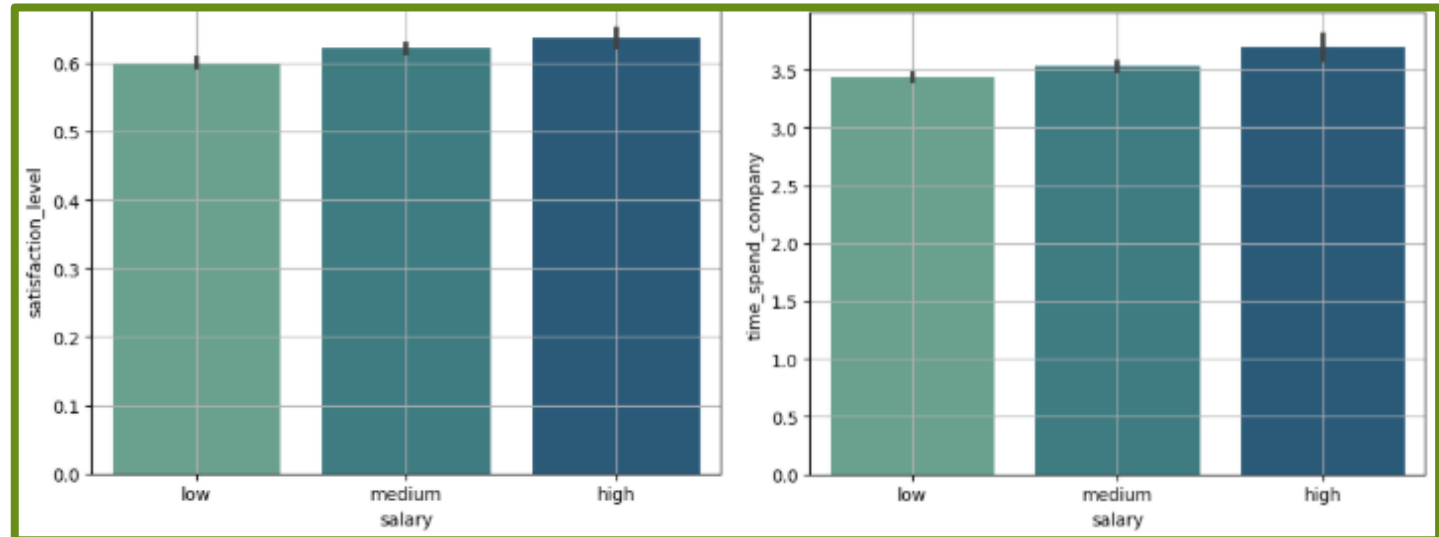

Data analysis

- Which are the factors that affect salary lowering?

- Around 22% of the employees getting high salary and around 20% of the employees are getting low salary among the employees with promotion.
- Only less than 10% of the employees getting high salary and around 50% of the employees are getting low salary among the employees with NO promotion.

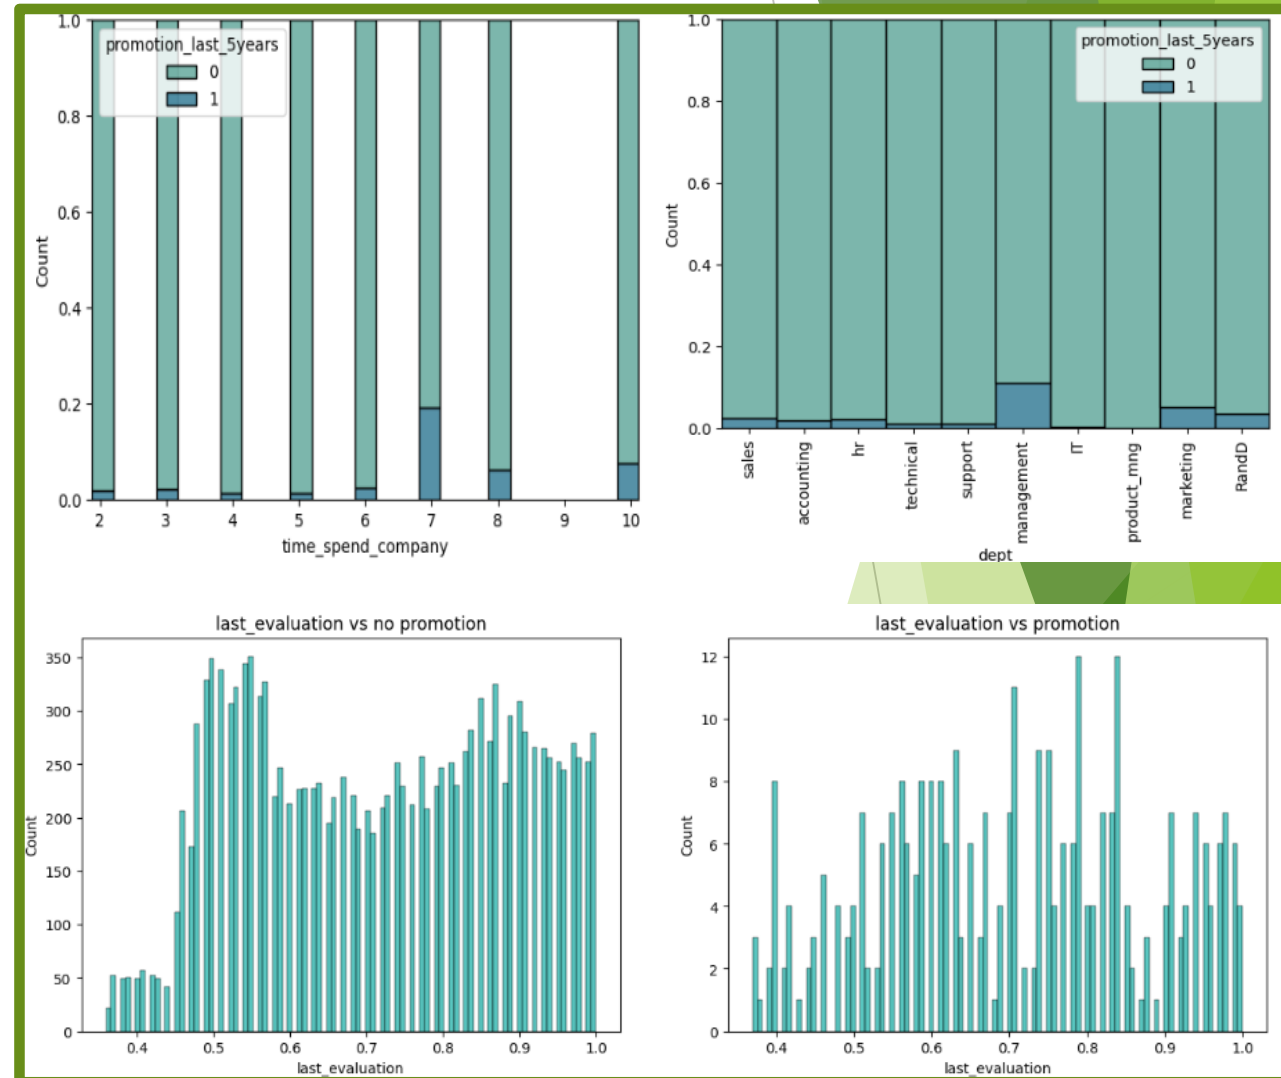

- There is an increment in satisfaction level according to increment in salary range
- Work experience and salary shows positive linear relation.
- In this graph the average work experience of employees with low, medium and high salaries are given.

Data analysis

- What are the factors that affect promotion?

- Employees with 7 or 8 or 10 years of experience has more chances of getting a promotion.
- The chances of a promotion for the employees in management department is higher than employees in other department
- The mode value of last_evaluation for the people who don't have promotion is around 0.55 where the mode value of last_evaluation for the people who have promotion is around 0.8.

The background features abstract, overlapping green geometric shapes, primarily triangles and polygons, in various shades of green, creating a modern and dynamic visual effect.
